

How do they do that??

This month's tutorial is from the talented Glenda Galvez. She will show us her easy way of making spectacular daisies using plunger cutters. This tutorial is a bit different. I'm going to give you the YouTube link so you can watch it step by step and I'll also put the step by step pictures here for you, too. No wording with the steps, you'll get that instruction on the video. Hope you enjoy it.

Please watch this wonderful YouTube [class link](#)

Step by step pictures

2.

3.

4.

5.

Some of the equipment Glenda used are:

Straight [veining stick](#)

[Multi center mold](#) (this mold is different but gives awesome results and allows you to do many sizes and shapes of centers.

[Fern](#) petal (this is a moss) you also can mix a tiny bit of fern into [buttercup](#) to give a similar look as in the picture about. In the video, Glenda just used moss.

PME set of three [plunger cutters](#). You can make different sizes of daisies using this set of 3.

A BIG **THANK YOU** to Glenda for sharing her beautiful and easy way to make quick daisies!
