

How DO they do that?

Instead of a step by step picture tutorial this month, we are featuring this YouTube video tutorial by Liz Marek. It's on making an awesome isomalt beer bottle bucket cake. Very easy and soooo cute! Thanks so much Liz!!

Click here for the link: [Beer Bottle Bucket Cake](#). IF the link doesn't work, type "Beer Bottle Bucket Cake" in the search tap on Youtube.com

Our friends at Cake Structure make the gorgeous bottle molds we carry. We have two sizes of the beer bottles [large](#) and [small](#). Also, don't forget the beer bottle brown isomalt by Simi and [bottle cap mold](#). And, the [desiccant](#) packets, they will keep your isomalt creations nice and clear until party day. Just store in airtight container with one packet. Total fun!

Hope you enjoy the video!
